

YWHO Engagement Model

- **Co-create:** Members jointly develop projects, services and processes that impact or interest them. They have the opportunity to lead activities, share in decision-making and work as equal partners with adults (e.g. jointly developing project resources such as tip sheets or clinical resources with YWHO YWHO Provincial Office staff)
- **Consult:** Young people/family members have identified roles, provide input and are informed how their input impact decision making (e.g. youth/family members provide feedback on survey questions)
- **Inform:** Young people/families are kept aware of programs, services or policy changes without contributing to the process (e.g. YWHO Provincial Office team provides advisory members with updates on YWHO).
